The YoY increase of total sales volume of camera modules is mainly attributable to the market share gains of the Group of camera modules, while the YoY sharp increase of sales volume of camera modules with resolutions of 10 megapixels and above is mainly attributable to that the Group’s strategy of upgrading product specifications has been realized gradually.

The MoM decrease is mainly attributable to the customers’ product cycle and the changes of some customers’ ways of taking delivery, while the YoY decrease is mainly attributable to the decrease in business of capacitive fingerprint recognition modules of the Group.
