The MoM decrease of total sales volume of camera modules is mainly attributable to the Group’s actively abandonment of some low resolution camera module projects to proceed the strategy of upgrading product specifications and to prepare the new mid-to-high end camera module projects. The YoY increase in sales of camera module products of 10 megapixels and above is mainly attributable to that the Group’s strategy of upgrading product specifications has been realized gradually.
3. Total sales volume of fingerprint recognition modules increased by approximately 36.0% MoM and decreased by approximately 10.3% YoY respectively. The MoM increase is mainly attributable to the customers’ product cycle and the commencing of bulk shipment of side button-coating fingerprint recognition modules of the Group.
